

2010

SUSTAINABLE LIVELIHOODS INTERNATIONAL UGANDA
(SLINT-UGANDA)

Annual Report

www.slint.org

"Empowering people to secure sustainable incomes, food security and improved quality of life in harmony with nature"

Over View of SLINT-Uganda

A Word from the Ag.Chairman of the Board

Dear Friends,

This past year was outstanding for Sustainable Livelihoods International Uganda (SLINT-Uganda), members of the board, our partners and the local people of Kiyuni parish, Kyankwanzi district in central Uganda. We are so excited about the passion and commitment you all showed that has enabled us come this far. We thank the Operation Groundswell (OG) volunteers, New Forests Project (NFP), Community Forests International (CFI), the Trees for the Future (TFF) Uganda; USAID LEAD and the Global Neighbour Network (Nabuur) volunteers, for enabling us achieve the remarkable results in 2010. The success we are witnessing now and the excitement about 2011 provides us the potential for building more networks and partnerships that will enable us achieve our mission and those of our partners. You have provided us with resources including insights, knowledge, skills and monetary support that have enabled us to carry out SLINT-Uganda's mandate. We are honoured to have played a role in the innovation and progress.

On behalf of the board members, I express our happiness with the achievements that SLINT-Uganda has realized in the last year.

Herein, I am pleased to share with you some of the achievements in 2010.

Dr. Lukeman .N. Mulumba
Ag. Chairman of the Board

Operation Groundswell Volunteers
SLINT-Uganda Board Members

Word from the Executive Director

Herewith in, SLINT-Uganda is highlighting the activities undertaken in 2010 with all our partners including the Operation Groundswell volunteers, Community Forests International, New Forests Project, Nabuur on-line volunteers and the local people among others.

We continued to expand on and monitor the main projects namely: Gayaza Smallholder Beekeeping and Gayaza Fruit Tree Growing and Community Forestry project being implemented in Kiyuni parish, Kyankwanzi district in central Uganda. We also involved in a collaborative research project titled "Adapting to climate change through integrated nutrient and water management for increased crop yields" being implemented in Iganga and Lira districts. Partners in the project include USAID LEAD, Makerere University and National Agriculture Research Organisation (NARO).

We are once again delighted to have built a strong network of the partners who have assisted us in empowering people to secure sustainable incomes, food security and improved quality of life in harmony with nature. Each project has provided a learning experience to SLINT-Uganda and the participants.

My warm gratitude goes to all those who have followed us since as we continue to actively contribute in the areas of: Poverty alleviation; Market-oriented agricultural development and food security; Environmental sustainability; and Capacity development and policy advocacy. Through these we are optimistic that SLINT-Uganda will sustainably improve the livelihoods of local people.

In 2011, SLINT-Uganda is initiating new sustainable livelihoods projects at the same time sustainably expanding those ready initiated in 2010, building on gained experience and synergies.

With Best wishes,

Denis Marsha Kabuuka
Executive Director

2010 Activity Areas

In 2010, SLINT-Uganda continued working with its partners including the Global Neighbour Network (nabuur.com) and USAID Livelihood Enterprises for Agricultural Development (LEAD) programme among others. A number of like minded partners including the Operation Groundswell (OG) based in Canada, Community Forests International (CFI) based in Canada, New Forests Project based in USA, district officials and local people partnered with SLINT-Uganda to implement livelihoods initiatives in Gayaza Sub County, Kyankwanzi district in central Uganda. This has been through the three projects namely: Kiyuni Fruit and Vegetable Growing for Sustainable Livelihoods; Gayaza Smallholder Beekeeping and Fruit Tree Growing and Community Forestry.

1) The Climate Change Adaptation Research Project

SLINT-Uganda has collaborated in and hosted a research and training project entitled "Adapting to Climate Change through Integrated Water and Nutrient Management for Increased crop Yields" that began in December 2009. The project, which is funded by USAID through the Livelihood Enterprises for Agricultural Development (LEAD) programme, is being implemented in partnership with Makerere University and the National Agricultural Research Organisation (NARO). The project focuses on adaptation to climate change through synchronizing planting dates in relation to soil moisture during the most critical

growth stages in rain-fed cropping systems. It explores ways of minimizing nutrient losses and increasing nutrient inputs using a low-cost approach. The goal of the project is to increase commercial and household agricultural production and build professional capacity in adapting to climate change.

Participants at a field experiment in Lira district

Participants at a field experiment training in Lira district

Twenty (20) field experiments in Lira and Iganga districts and a series of field visits have been made to the two districts by the core research team, the Project coordinator, collaborators, academic supervisors and students. During this time, a baseline study on the socio-economic characteristics in the project area was also conducted (<http://www.slint.org/climate-adaptation.html>)

The successful completion of the project will culminate in the development of optimum soil moisture conservation technologies for farmers to avert the effects of droughts, thereby improving

livelihoods of farming communities in Uganda through soil health improvement, better incomes and food security. The gains made by the project will be sustained through farmer education using participatory approaches such as the Farmer Field Schools (FFS), on-farm demonstrations and farmer field days. SLINT-Uganda will work closely with collaborating organisations in disseminating the findings.

The Gayaza Smallholder Fruit-Tree Growing and Community Forestry Project

In 2010, over 4000 seedlings of fruit trees and other agroforestry trees were distributed to more than 50 households in Kiyuni parish, Kyankwanzi district. The seedlings were raised in two community tree nurseries set up at Butikiro and Kiyuni villages under the "Gayaza Smallholder Fruit-Tree Growing and Community Forestry Project."

Many farmers including Ms. Mukamalita, Ms. Nannyonga and Mr. Ssebbowa engaged their children in the planting of the fruit trees and other multi-purpose trees (firewood, timber, fodder and non-timber products) and services in the area. Tree seedlings of eight different tree species namely: Neem (Scientific name: *Azadirachta indica*); Silky oak (Scientific name: *Gravellia robusta*); African mahogany (Scientific name: *Khaya grandifoliola*); *Leucaena* (Scientific name: *Leucaena lucocephalla*); Musizi (Scientific name: *Maesopsis eminii*); Mango (Scientific name: *Mangifera indica*); Muvule (Scientific name: *Milicia excelsa*) and Guava (Scientific name: *Psidium guajava*) were facilitated to the farmers with support from SLINT-Uganda.

The project aims at improving the livelihoods of local people and contributing to the conservation of the environment

through promoting fruit-tree growing and community forestry. It aims to support farmers to raise and plant more 20,000 trees over three years and at least 100 households will be supported directly by the project.

The project received in-kind support from the following partner organizations including:

- Community Forests International based in Canada, whose staff Daimen and Estelle facilitated a training workshop on nursery set-up and tree care in Butikiro village to more than 30 farmers in May 2010.
- New Forests Project who donated agroforestry and multi-purpose tree seeds. Some of the seeds donated included Acacia Senegal and Albizia lebbeck.
- Trees For the Future Uganda an agroforestry resource center donated tree seeds including exotic Albizia trees (scientific name: *Albizia Chinensis*), locally known as "omugavu", and Calliandra.
- The OG student volunteers worked to expand the two community nurseries and assisted in the establishment of two school tree nurseries at Nankandula and Kyumulalama Primary Schools located in Kiyuni and Butikiro villages respectively. The activities enabled the expansion of the two community tree nurseries. They further enabled the mobilization of the local communities towards working on and managing the tree nursery.

Trees and forests are disappearing at unprecedented rates in many rural areas in Uganda resulting in shortage of tree products (e.g. firewood) and adverse environmental effects including, soil erosion,

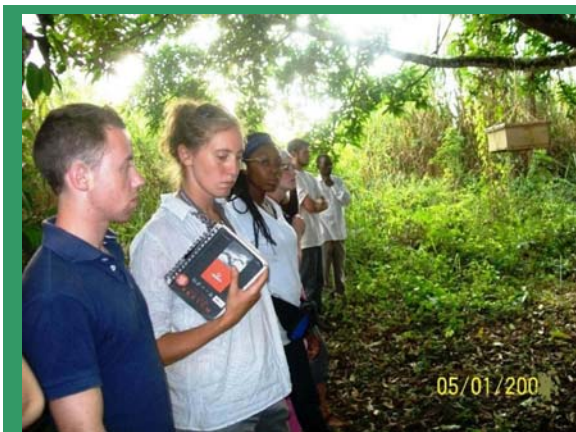

land degradation, disruption of water supplies, climate change and loss of biodiversity. Fruit-tree growing and community forestry are relatively low-cost and convenient activities that allow farmers to contribute to addressing these challenges.

The project seeks \$10,000 to support the growing of fruit trees including mango, orange, avocado and other multi-purpose and agroforestry trees. It also aims to expand the two community nurseries, increase awareness on the value and importance of planting trees through producing awareness materials, technical advice; extension services and field visits.

The Gayaza Smallholder Beekeeping Project

OG Volunteers visit a bee apiary in Butikiro

During 2010, SLINT-Uganda continued monitoring the pilot project-Gayaza Smallholder Beekeeping Project. With in-kind donation from the OG volunteers, a Participatory Rural Appraisal session and a Refresher Training Workshop on Beekeeping was organized. The workshop organized in Butikiro on 17 July 2010 was conducted by Mr. Patrick Rutagyengwa a bee keeping expert from the East African Beekeepers and Equipment Limited, located in Kampala city, Uganda. It enabled the farmers and the community apiary supervisors including Mr. Tito Byakatonda; Mr. Jonathan Ssali; Mr. Joseph Babumba; Mr. Denis Tomusange; and Mrs. Norah Babumba from Kiyuni and Butikiro to share their experiences, air out and address key challenges they had so far faced in relation to apiary management and inspection of beehives. The hands-on training for the apiary supervisors was aimed at enabling the farmers acquire skills in apiary management and in particular hive monitoring and management.

Patrick briefs volunteers about bee management at the workshop

The project seeks \$10,000 to assist more than 50 beneficiaries to acquire a total of 150 modern beehives and honey harvesting equipment including 3 bee suits, 3 smokers and 1 honey extractor. It also aims to support 2 workshops in apiary management, honey harvesting and post-harvest handling skills. Awareness materials, technical advice; extension services and field visits are also planned.

The Kiyuni Fruit and Vegetable Growing for Sustainable Livelihoods Project

Five model farmers were selected with the objective of further demonstrating to other farmers the value of growing fruits and vegetables. The pilot project has since supported the farmers *inter alia* through accessing improved seeds, extension support, technical advice and further mobilising farmer group formation. In meeting the overall aim of the programme i.e. enabling the participating farmers to secure sustainable incomes, food security, improved nutrition and employment opportunities, US\$

7,500 is being sought to fully support farmers' access to seeds, technical training, extension support and technical advice.

OG volunteers visiting a farmers' vegetable garden in Butikiro

Volunteers visit farmers' homes to learn about livelihood activities

Partnership Development

SLINT-Uganda continued to strengthen and identify new networking and partnership objectives thereby furthering the missions of all organizations involved. Partnerships were developed with the following organizations and SLINT-Uganda is grateful for their support.

a) Community Forests International (CFI) based in Canada

In May 2010, SLINT-Uganda hosted staff from Community Forests International (CFI) who visited Kiboga district. A training workshop was facilitated in Butikiro village by Daimen and Estelle both staff of CFI to more than 30 farmers who were eager to learn about tree nursery set-up and tree care: <http://forestsinternational.org/2010/05/kiboga-district-uganda/>

b) The Operation Groundswell

In July 2010, SLINT-Uganda hosted 17 student volunteers from Canada, USA and Kenya who were on a study visit organised by **Operation Groundswell**, an organisation based in Canada. The objective of the study visit was to provide an opportunity for the volunteers and local people to share knowledge and learn from each other's experiences and innovative ideas about their livelihoods activities. The visit also provided a platform for intercultural interaction and mutual learning among rural farmers in Kiboga and the volunteers.

The volunteers also visited and worked to expand the two community tree nurseries. Two community apiaries and a model fruit and vegetable growing project supported by SLINT-Uganda were also visited. The volunteers also assisted in the establishment of two school tree nurseries at Nankandula and Kyamulalama Primary Schools located in Kiyuni and Butikiro villages respectively. They together

with the local people participated in the preparation of potting soil mixture, filling of polybags (potting)

Estelle during a tree nursery management training in Butikiro

Daimen and Estelle in Kiyuni, Kyankwanzi, Uganda

and planting of seeds into polybags. More than 1000 tree seeds were potted. They also took part in a Participatory Rural Appraisal session and a Refresher Training Workshop on Beekeeping.

c) New Forests Project

Partnership was developed with the New Forests project (<http://www.newforestsproject.org/>) an organization based in USA, who donated agroforestry and multi-purpose tree seeds. The tree seeds donated included the Acacia Senegal;

Albizia lebeck; Grevillea robusta; and Leucaena leucocephala among others. SLINT-Uganda will distribute some of the seeds to community groups, raise these in the two community nurseries as well as establish a local orchard to enable the production of the seeds locally. The seed donation contributes to the New Forests Project mission i.e. to protect, conserve, and enhance the health of the Earth's ecosystems and the people depending on them by supporting integrated grassroots efforts in agroforestry, reforestation, protection of watersheds and water and

sanitation; as well to SLINT-Uganda's mission.

d) Trees For the Future Uganda

SLINT-Uganda continued receiving in-kind tree seeds donation from the "Trees For the Future" (www.treesfff.org), an agroforestry resource center. The mission of the Centre is working with people to improve livelihoods and restore degraded lands to sustainable productivity through planting beneficial trees. The seeds received included: exotic Albizia trees (scientific name: Albizia Chinensis), locally known as "omugavu", and Calliandra. These were raised in the community tree nurseries and distributed to farmers.

e) The Global Neighbour Network (Nabuur.com)

SLINT-Uganda's website was redesigned free of charge by Ms. Marina Klimi, a volunteer with the Online Volunteer Network, NABUUR (<http://www.nabuur.com/en/village/kiyuni-parish/news>) and founder of the Web Design company known as Pandora Web Box (<http://www.designpandorabox.eu/portfolio.html>). The new website has gone a long way in helping SLINT-Uganda to communicate more effectively and contribute to the achievement of its mission.

Nabuur continued to play an important and valued role and offered opportunities for sharing of knowledge and experiences on development ideas. Each of the volunteers helped achieve important milestones. Information about SLINT-Uganda supported programmes is available via these web sites, as well as examples of activities led on the ground. The web sites continue to be essential to communicate information on key undertakings, updates and areas of activity.

Education, Training and Awareness

A number of formal trainings, workshops, and awareness activities were provided by SLINT-Uganda as a means to support the various programmes and activities being implemented. These included:

Community Outreach initiatives

A number of activities were carried out to increase connectivity and visibility of key activities. These included the following:

- Resource fact sheets on nursery management and tree planting were produced and disseminated to farmers and nursery supervisors.
- Quarterly newsletters were produced highlighting important milestones and shared out with greater audiences through SLINT-Uganda web site, nabuur platform and organisations with mutual interests.

LOOKING INTO THE FUTURE

In 2011 SLINT-Uganda will work to expand and initiate projects that will provide SLINT-Uganda with the opportunity to once again focus on positive messages and forward looking solutions and practices. The projects will include:

- Gayaza Smallholders Organic Beekeeping project;
- Gayaza Fruit Tree Growing and Community Forestry project;
- The collaborative research and training project with Makerere University and NARO entitled: "Adapting to Climate Change through Integrated Water and Nutrient Management for Increased crop Yields".
- Kiyuni Fruit and Vegetable Growing for Sustainable Livelihoods project piloted in 2009.
- Initiate a project on affordable rural solar lighting.
- Organise commemorative events to mark key international days and events such as the World: Biodiversity Day, Environmental Day, Poverty Day and Food Day among others.
- Identify and as well further strengthen the existing networks and partnerships on drawing experiences from the partner organisations such as CFI, New Forests project, Environmental Alert, World Vision and CARE Uganda. In the framework of partnership and cooperation it will continue to promote synergies and share good practices.

FINANCE AND ADMINISTRATION COMMITTEE'S REPORT

The Finance and Administration Committee has pleasure in presenting their report together with the Audited Accounts for the period ended 31st December 2010 which discloses the state of affairs of Sustainable Livelihoods International Uganda (SLINT-Uganda).

CORE PROGRAMME STRATEGIES

With the mission of empowering people to secure sustainable incomes, food security and improved quality of the life while at the time maintaining the diversity the diversity and long-term productivity of the natural resources that underpin their livelihoods, SLINT-Uganda engages in four core programme strategies namely:-

1. Poverty Alleviation
2. Market Oriented Agriculture Development and Food security.
3. Environmental Sustainability
4. Capacity Development and Policy Advocacy.

RESULTS

The results of SLINT-Uganda for the year are shown in the Income statement account on page 6.

DIRECTORS AND BOARD MEMBERS

The names of the Board Members who are currently holding office are as below

Dr. Lukman Nagaya Mulumba	Ag. Chairman of the Board
Mr. Denis Marsha Kabuuka	Executive Director/Secretary to the Board
Mrs. Victoria Namulawa Tibenda	Assistant Secretary
Mr. Frank Kiggundu	Treasurer
Mrs. Edith Bazanye	Member,
Mrs. Margaret Lwanga	Member

AUDITORS

The Auditors Acco. Accountants, Auditors and Tax Consultants were re-appointed to offer Audit services to our organization.

By order of the Board

**Executive Director/Secretary to the Board
Kampala, Uganda**

Statement of Executive Director's Responsibilities

Sustainable Livelihoods International Uganda (SLINT- Uganda) requires the Executive Director to prepare financial statements which give a true and fair view of the state of affairs of SLINT – Uganda as at the end of the financial year and of the operating results for that year. It also requires the Executive Director to ensure that SLINT–Uganda maintains proper accounting records which disclose with reasonable accuracy the financial position of the organisation. The Executive Director is also responsible for safeguarding the assets of the organization.

The Executive Director accepts the responsibility for the financial statement which has been prepared using appropriate accounting policies supported by reasonable and prudent judgments. The Executive Director is of the opinion that the financial statements give a true and fair view of the state of financial affairs of the organization as at 31st December 2010 and of its operating results for the year ended. The Executive Director confirms the accuracy and completeness of the accounting records maintained by the organization, which have relied upon the preparation of the financial statement as well as on the accuracy of the systems of the internal financial controls.

Nothing has come to the attention of the Executive Director to indicate the SLINT–Uganda will not remain a going concern for at least the next twelve months from the date of this statement.

Executive Director/ Secretary to the Board

AUDITOR'S REPORT

To the Members of Sustainable Livelihoods International – Uganda (SLINT – UGANDA);

We the ACCO. Accountants, Auditors & Tax Consultants have audited the financial statements of the organisation, for the financial year ended 31st December, 2010 which have been prepared under the Historical cost convention and on the basis of Accounting policies set out on page 14-18.

DIRECTOR'S RESPONSIBILITY FOR THE FUND ACCOUNTABILITY STATEMENT

The Director is responsible for preparation of financial statements. Our responsibility is to form an independent opinion on the funds accountability and operating statements based on our audit and to report our opinion to you.

BASIS OF OPINION

We conducted our audit in accordance with the generally accepted standards. We planned and performed our audit so as to obtain reasonable assurance that the financial statements are free from material misstatements. An audit includes examination on test basis of audience relevant to the amounts and disclosures in the accounts. It also includes assessment of the significant estimates and judgments made by the directors in separation of the financial statements and whether the accounting policies are appropriate in the organizations circumstances, consistency applied and adequately disclosed.

OPINION

In our opinion, proper books of accounts have been kept and the financial statement together with notes give a true and fair view of the state of the financial affairs of the organization as at 31st December , 2010.

NOTES TO THE FINANCIAL STATEMENT FOR THE PERIOD ENDED 31/12/2010

1. PRINCIPLE ACCOUNTING POLICIES

(a) Basis of Accounting

The Fund accountability statement is prepared on cash basis and the balance sheet on a modified accrual basis. All income is recorded as revenue when received and all expenses are recorded as expenditure when paid.

(b) Funding

Funding represent the amount budgeted for and actually received. The organization's funding was in respect of donations as well as member's subscription/contribution which are accounted for when received. Funds received were as follows:-

Source	Amount U.SHS
Donation from USAID/Lead Fund	129,527,322
Board members contribution and OG Volunteers	1,247,507

Total	130,774,829
	=====

(c) Depreciation

Depreciation is calculated to write off the cost or valuation of fixed assets on a straight-line method over the expected lives of the assets concerned.

(d) Foreign Currency

Transactions are converted at exchange rate applicable at the dates of the transaction. All exchange rate differences are dealt with in the accountability statement.

(e) Taxation

No provision has been made for taxation as the organization are tax exempt under Section 22 (u) of Income Tax Act 1997.

2. SCHEDULE OF FIXED ASSETS AS AT 31ST DECEMBER 2010

How to Support SLINT-Uganda

SLINT-Uganda's work depends entirely on the generosity of donors like you, who understand the importance of supporting small grassroots initiatives in order to create long-term change.

Sustainable Livelihoods International Uganda (SLINT-Uganda) is a registered nongovernmental organization dedicated to the eradication of poverty and hunger and protection of the environment in Uganda. It was registered in 2006 under the Uganda NGO Registration Statute of 1989 (registration number S.5914/6726) and as a non-profit company limited by guarantee and with no share capital, under the Companies Act of Uganda. The organisation is currently supported by private individuals.

The organization is committed to keeping its costs low to get as much money as possible into the field.

Support us by making a gift of cash, stock or by putting SLINT-Uganda in your long term financial plans.

Stay informed by joining us in our quarterly e-newsletters and please visit us online at www.slint.org where you can see our projects, learn about new initiatives, read profiles of advisors, and stay current on important issues around the globe.

To learn more, please contact us at +256-782-170-414 or slint-uganda@slint.org

We look forward to hearing from you!
